.

Technical features: Waterproof index IP66 Cone size 6" Outdoor diameter 175.5mm Chassis size

145mm Depth 69mm Impedance 40h Frequency range 120HZ-20KHZ Max power 80w Grid
Stainless aluminium Warranty 2 years

9 3/4 filter door with its silicophosphate cartridge

Technical feature:

- Two-part filter equipped with a cartridge center to facilitate their replacement
- Events equipped with toric seals for perfect waterproofing.
- Brass inserts to avoid distorting tapping, a source of subsequent leaks.

Maximum speed with cartridges: 1500L/h, Frost Fears, Entry/Exit 3/4 inch.

- Mounts before the devices to be protected
- Entry/Exit 20/27
- Maximum static pressure 5 bars
- The installation of a pressure reducer set to 4 bars is mandatory.
- It is recommended to install an anti-return valve at the exit of the filter door
- An anti-pollution valve upstream of the product and downstream of the water meter is required.
- Fears frost
- Climb to a dry place away from the light.
- Do not use sealing paste or seal paste, preferably use Teflon
- Leave a space of at least 5 cm under the tanks to facilitate maintenance
- 200 m3 treatment

Maintenance:

- Before changing the cartridge, cut off the water and unscrew the vents to put atmospheric pressure
- Loosen the tank with the key, then by hand
- Change the cartridge, and grease the toric seal of the tank with dietary grease

-
- Replace the tank and tighten by hand, do not tighten the key. The key is only used to loosen the filter tanks
 - When re-watering, turn on the vents to flush out the air
 - The silicophosphate cartridge is to be replaced about every 6 months. Lifespan depends on the quality of your water and your use.
 - If not used for more than 2 days, run the water for 5 minutes before use
 - We recommend replacing the cartridge every 6 months to 1 year
