

# Sauna Bronze door 80 x 190 tempered glass 8mm safe

## **Product description:**

80 x 190 cm bronze sauna door made of solid pine and 8mm tempered glass

The hinges of the doors are made of pine rolled without twigs, which prevents the curvature of the wood and the appearance of resin

The door handles are made of wood

The perimeter of the door is insulated with a silicone-based compression seal

The dark hue of the door provides more privacy to the session

Doors are built with the requirements for safe operation during your sauna sessions in mind.

Doors are designed so that they can be opened to the left or right

Taking into account the experience of sauna builders, the door must be installed so that there is a space of 5 to 6 cm between the floor and the bottom of the door

This is necessary to allow a flow of fresh air to pass through and to ventilate the sauna

The lower door amount should not be installed directly on the ground, the chassis will not absorb moisture from the soil in this case

Doors are reversible and sold already mounted in a cardboard box (including assembly

instructions)

Technical features:

Dimensions: 80 x 190 cm

Weight: 30 Kg

Matter: Massive pine

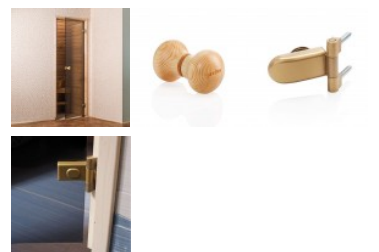

Bronze 8mm secure glass

grey hinge
