

Complete water purification and UV filtration tap kit 6W 300 Liters / hour

Product description:

Complete UV sterilizer kit with tap and double filter holder supplied

This complete 6W tap and water sterilizer kit makes it possible to drink 300 liters of water per hour, or 6 liters per minute from any quality of water.

All parts are provided to make installation easy and allow you to enjoy clear and perfectly drinkable water as soon as possible.

The double filter holder consists of a sediment filter and a carbon filter, to make the water clear before filtering tastes and odors and allowing UV sterilization to be perfectly effective.

Ultraviolet sterilization will completely eliminate all organic matter such as algae, microbes, bacteria and viruses.

A tap is supplied with its connection system to complete the kit. It can be installed on a three-way connector or simply attached to a conventional tap.

An "American" type water connector is also provided, simply cut to adjust the connector to the desired size and then connect each side using the connector provided.

Technical characteristics :
