

Hamмам cabin construction kit to be tiled 240 x 120 with steam generator

Reference: KCH_04
EAN13: 3700830430295

Hamмам cabin construction kit to be tiled 240 x 120 with steam generator

Panels can be rail mounted or glued directly to existing walls.

Please note: this is not a pre-assembled cabin. The elements supplied make it possible to create a cabin of approximately L 240 x W 120 cm. Height between 200 and 240 cm (you can cut the panels to adjust the height).

Assembly principle:

- 1 - Prepare the existing rail and/or wall structure
- 2 - Preparation of the screed with evacuation and installation of the tray
- 3 - Installation of XPS panels (screwed on rails / glued on walls) - Walls + sloping roof
- 4 - Installation of the bench and the niche
- 5 - Installation of the door
- 6 - Coat the panels and tile
- 7 - Installation of accessories (Lighting, steam outlet nozzle, temperature probe)

*** The rails (panel and door fixings) are not supplied. Excluding tiling, excluding installation**
