

## Kit de raccordement pour cartouche filtrante réfrigérateur frigo américain raccord en t fournis

Universal connection kit for American refrigerator filter cartridge T-connector supplied

This universal connection kit will allow you to connect your water supply to your refrigerator, your filter cartridges, your filtration taps etc...

This connection kit is made of food-safe POM material, which is resistant to high pressure, aging, cracking, corrosion and does not become brittle after prolonged use.

Designed to meet exact size requirements so users can connect and disconnect quickly and easily, and replaces threaded or flanged connections that require a wrench.

This water supply connection kit is suitable for refrigerators, filtration systems, ice makers, reverse osmosis filtration systems, water coolers and water dispensers as well as air humidifiers.

The filter is placed at the back of your American refrigerator or water inlet.

Fully certified by NSF to NSF Standard 42

It allows your water to regain its natural taste and odor by eliminating the odors of chlorine and other purifying agents.

Filters up to 5500 liters of water or approximately 6 months of use

The filter is equipped with a system with 2 1/4" quick connectors

Compact device (diameter 50 mm) and space-saving (height 265 mm).

Easy installation: simply replace the old filter on the back of the refrigerator with a simple clip.

Compatible with: Samsung DA29-10105J, EF-9603, WSF-100, HAFEX/EXP, DA99-02131B, DA29-10105C, DA29-10105E; Model number: Samsung RS21DNSV, RS21JCSV, RS21FCSV, RS21DCMS, RS21DCNS, RS21DNS, RS21DNS, RS21DPSM, RS21FCNS and any other Samsung refrigerator model using an external water filter cartridge that connects in-line with the water line supplying the refrigerator .
