

UVC LAMP 40W GERMICIDE TUV 40W 4P SE PUREWAVE for UV potabilization

Product description:

UVC LAMP 40W GERMICIDE PUREWAVE for
UV Control Basin - TUV 36T5 HE 4P SE 40w

Discover our 40W UV lamp, an effective and powerful solution for water disinfection. Designed to eliminate bacteria, viruses and other harmful micro-organisms in a variety of environments such as drinking water, waste water, pools and cold rooms. Its exceptional design and performance make it an ideal choice for demanding applications.

Benefits Keys and Polyvalent Use:

- **High Efficiency Germicide** : The 40W lamp is specially designed to ensure complete disinfection, eliminating pests in various aquatic environments.
- **Perfect integration** : Thanks to a careful design with a quartz body, this lamp easily integrates into any type of reactor, maximizing the effectiveness of UV sterilization.
- **Universal compatibility** : Working with a 12-volt power supply, this UV lamp is perfectly adapted to various sectors, including hospitals, research laboratories, the pharmaceutical industry and agri-food industry, guaranteeing a flexible and extended application.
- **Optimal dimensions** : With a length of 845 mm and a diameter of Ø 16 mm, it combines compactness and performance, making it ideal for installations where space is limited but where high performance is required.
- **Long Life** : Provides impressive durability

with an average life of 9,000 hours, reducing frequent replacement needs and maintenance costs.

Technical Specifications Detail:

- Model : TUV 36T5 HE 4P SE 40W, integrated into a robust quartz tube for better UV transmission.
- Power : 40W, ensuring efficient and rapid sterilization.
- Food 12 volts, for easy and secure use in various environments.
- Dimensions : Length of 845 mm and diameter of Ø 16 mm, perfect for a variety of disinfection system configurations.
- Warranty : Accompanied by a one-year warranty, affirming the quality and reliability of our product.

This UV lamp is the ideal solution for those looking for a method of water disinfection both efficient and ecological, minimizing the use of chemicals while providing maximum protection against pathogens. Invest in our UV technology to ensure the purity and safety of your water.
