

LAMPE UVC 11W GERMICIDE PUREWAVE 4P tube for UV potabilisation

Reference: Tube 4P SE 11w desineo
EAN13: 3700830430837

UVC LAMP 11W GERMICIDE PUREWAVE for UV dosage Basin - 4P SE Tube

Discover our 11W UV lamp, specifically designed to effectively eradicate bacteria, viruses and other microorganisms in a variety of aquatic and air contexts. Perfect for drinking water treatment systems, waste water, swimming pools and cold room applications, this UV lamp combines high performance, easy integration and long-term reliability.

Main Atouts of Our UV Lamp:

- High Efficiency Germicide : With a power of 11W, this lamp is ideal for destroying pathogens in various environments, thus ensuring a high quality water and air.
- Integration without Effort : Designed with a quartz body, it fits perfectly into the reactor, maximizing the efficacy of disinfection through optimal UV transmission.
- Application versatility : Working on a 12-volt power supply, our UV lamp easily adapts to various environments, including in the hospital, pharmaceutical, bacteriological, and agri-food sectors.
- Compact design : With a length of 210 mm and a diameter of 11 mm, it is designed to adapt to restricted areas while offering exceptional performance.
- Long-term sustainability : Enjoy an average life of 9,000 hours, reducing the frequent need for replacement and ensuring continuous disinfection.

Technical Specifications:

- Model TUV 11W 4P SE
- Dimensions : 240 mm length, 11 mm diameter
- Life : Up to 9,000 hours for extended use and less maintenance

-
- Warranty : Accompanied with a 1 year warranty, confirming the quality and reliability of our product.

This UV lamp is the perfect solution for those looking for effective and sustainable disinfection, without the use of chemicals. It is particularly suitable for health safety in critical environments. Invest in our UV lamp to maintain high hygiene standards in your installations.
