Product description:

UV Water Treatment Station 10 inches triple filtration Domestique Premium Desineo for home apartment

Discover the Premium Desineo Domestique Water Treatment Station, a high-end 4-step solution for clean, healthy and superior water.

Premium features:

- **4 Phase Filtration** : This advanced filtration system includes a PP filter (20 microns), a CTO filter, a carbon granular filter (GAC) and a UV filter, guaranteeing exceptional water purification.
- **PP filter (20 microns)** : Designed for optimal filtration, this filter eliminates large particles and reduces turbidity, thus extending the life of other filters.
- **CTO filter (Active charcoal)** : Effectively removes chlorine, tastes and unwanted odors, offering water to a pleasant taste, without chemical contaminants.
- **Charcoal Granules Filter (GAC)** : Eliminates residual impurities, for an even purer and refreshing water.
- **High Performance UV filter** : Eradicates up to 99.99 % of coliform bacteria and other harmful micro-organisms, ensuring ultra-secured drinking water for your

family.

Premium Technical Specifications:

- **Debit** 30 litres per minute (LPM)
- **Case material** : High quality stainless steel (SS304), corrosion resistant for maximum durability
- **Input voltage** : 120-240 V, 50/60 Hz, compatible with most domestic electrical installations
- **Power of the UV lamp** : 10,000 hours of continuous use, for reliable long-term performance
- **Alarm system** : Integrated sound and visual alarm, ensuring constant monitoring of the system
- **Enter/Sortie** 1 inch for fast and carefree installation
- **Dimensions** : 80 x 20 x 42,5 cm, ideal for wall installation in any house
- **Material of the Prefiltration Case** : robust PVC, designed for sustainable use

Why Opter for the Desineo Premium Treatment Station?
