

uvc 11 w 22cm

Product description:

This spare bulb **11W T5 UV** is an essential element for **uV sterilization systems** and **water filtration**, whether domestic or professional applications. With a length of **22 cm** and one **4 pin T5 connection**, it is compatible with a wide variety of devices, including sterilizers and filters used in environments such as aquariums, garden basins, and some industrial water treatment systems. Its design **glass** and **ceramics** ensures maximum durability, resistant to prolonged use and continuous UV exposure.

This UV bulb is distinguished by a **long life of 9,000 hours**, ensuring long-term economic use. It effectively helps to maintain clean water in a variety of environments **neutralizing microorganisms**, such as **bacteria** and **virus**, which may affect water quality. Whether for water filtration systems in garden basins, swimming pools, or for the maintenance of industrial equipment, this UV T5 bulb is a reliable solution to ensure an optimal level of sterilization.

Its compatibility with the **uV filtration systems**, like **Laguna Pressure Flo**, makes it an ideal choice for those looking for an easy to install and efficient spare part. Thanks to its ability to improve water quality and protect filtration equipment from harmful agents, this bulb not only extends the life of the systems in which it is used, but also ensures better filtration efficiency.

Opt for this spare bulb **11W T5 UV**, is investing in a product designed to deliver consistent and reliable results, ensuring efficient water filtration

and reducing contaminants in your facilities. Whether you have a basin, aquarium, or a more complex water treatment system, this UV light bulb is an essential choice to ensure the **purity of water** in the long term.
