# LAMP PHILIPS Tube 4P SE 16w UVC GERMICIDE for UV potabilisation Bassin

## **Product description:**

LAMP PHILIPS Tube 4P SE 16w UVC  
GERMICIDE for UV potabilisation Bassin

Discover our Philips 16W UV lamp, designed for perfect integration into the reactor body of your sterilization system. This lamp is essential to ensure effective and safe disinfection of water, air and surfaces in demanding contexts.

## **Key features and benefits:**

- **High Efficiency Germicide :** With 16W power, this Philips UV lamp is specially designed to eliminate bacteria, viruses and other harmful micro-organisms.
- **Simplified installation :** The lamp is easily integrated into any UV sterilization system thanks to its optimal dimensions of 325 mm in length and a diameter of 16 mm.
- **Long Life :** Enjoy an average life of 9,000 hours, reducing the need for frequent replacements and maximizing operational efficiency.
- **Secured food :** Works with a 12 volt ballast for a safe and stable supply, ensuring constant and reliable performance.
- **Application versatility :** Ideal for disinfection in various environments such as hospitals, bacteriological and pharmaceutical research laboratories, agri-food industries, as well as for the treatment of drinking water, waste water, swimming pools and cold rooms.

**Guarantee and reliability :**

- 2-year warranty : We are confident in the quality and reliability of our product, offering an extended warranty for total peace of mind.

Use our Philips UV lamp to ensure effective sterilization and continue to protect your environment from microbiological threats. Perfect for professionals demanding the highest level of purity and safety, this lamp is a good investment for any UV disinfection system.
