

# Shower head - turbo economy shower - Desineo

## Product description:

### **Turbocharged Shower Pump – High Pressure & Water Economy**

Offer yourself a revolutionary shower experience with our **turbocharged Water Saving Shower Head**, designed to combine power, comfort and energy efficiency. Featuring an elegant design in chrome finish, this head is as efficient as aesthetic. It sets up in a blink of an eye on all standard hoses and turns your daily shower into a real moment of well-being.

### **High Pressure Turbo**

Thanks to its integrated overpressure technology, this head provides a concentrated and powerful jet, even with low water pressure. It creates a turbo micro-perforation effect that increases the speed of the jet while reducing fuel consumption.

### **Water saving Up to 40%**

With an innovative flow optimization system, this model allows you to make significant savings on your water bill. You enjoy a pleasant shower while taking an ecological gesture on a daily basis.

### **Integrated Stop Button**

Unique and practical, the button **STOP** placed on the handle allows you to instantly cut the water jet without touching the tap. Ideal for soaping or shampooing without wasting a drop.

### **Water filtration**

The head is equipped with a **filter system** inside the handle, designed to retain impurities, limestone residues and chlorine. The result: fresher water, respectful of skin and hair, ideal for the whole family.

### **Easy & Universal Installation**

No technical skills required: the head simply screws on any standard shower hose (G1/2). No tools required, it is ready to use in less than a minute.
