

Swimspa Fitness 2 DEEP

Reference: Spa de nage "Fitness 2"
EAN13: 3794290143406

Spas Passion is the only manufacturer of Swim Spas in the world to offer the Current Lift technology, allowing the swimmer to stay down on the surface of water regardless of the current resistance level.

The Fitness of Spas of swimming range is designed to provide a true experience of swimming adapted to the intensity of your workout. Our innovative technology "Current Lift" has been developed not Spa Passion and automatically adjusts it running water to the intensity of your workout. If you decrease the strength of the two senior swim jets, lower swim jets automatically increase the intensity, which creates the most selection, giving increased buoyancy when your swimming speed decreases. More you swim fast, less you need lower jets lift and the flow is directed to lower jets to increase from the current. The Swim Spas of the Fitness range also include standard option Rowing Gear, the access dock to the swim Spa and the system of maintenance of water in synergy.
