

Swimspa The Energy

Product description:

Our new Swim Spas models combine our exclusive technology Current Lift, to the most innovative techniques of massage of the market.

Swimming energy and spirit spas combine the innovative "Current Lift" technology to a variety of innovative experiments of massage. Spas Passion combines all our unique innovations of massage in a single sap of swimming therapy. Massage Aque Rolling TM, area of care Intense TM, and area of care to wave TM, are all included in spas by swimming spirit and energy, offering a full range of choices of care. Swimming and spa sections are separate, you can vary the temperatures of the two units, a training session at low temperature in the swimming corridor before you relax your tired muscles in the hot water of the spa. Heating systems on two areas of spirit and energy swimming spas allow you to enjoy the best of both worlds - swim and relax - in a single swim spa!
