

# Light source for fiber optics 16w RGB

## **Product description:**

Source light 16w RGB for optical fiber with infrared remote control

A life expectancy of more than 50,000 hours with led technology

high intensity!

Allows the diffusion of light in optical fiber

Easy to use, easy to install

## **Technical features:**

Generator of light by led high intensity

Power: 16 W

frequency: 50 hz / 60 hz

Dimensions: 12 x 9 x 4 cm

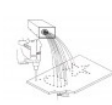

Manual control or by infrared remote control

Material: aluminium brushed with leg for wall mounting

**Warranty 1 year**
