

Aromatic diffuser for steam Aromabox

Product description:

Aromatic diffuser for steam Aromabox

This AROMABOX aroma diffuser is placed instead of the mist outlet nozzle and allows to broadcast aromas from essential oils or herbs to flavor your hammam session

The upper part of the diffuser stands and opens to hold your natural aromas (dehydrated plants) or concentrated (tablets / liquid)

For the use of fluids, use a sponge or a material absorbing (sponge - fabric) in order to retain the liquid that will be broadcast in a passive way when steam will pass through the aromatic diffuser
